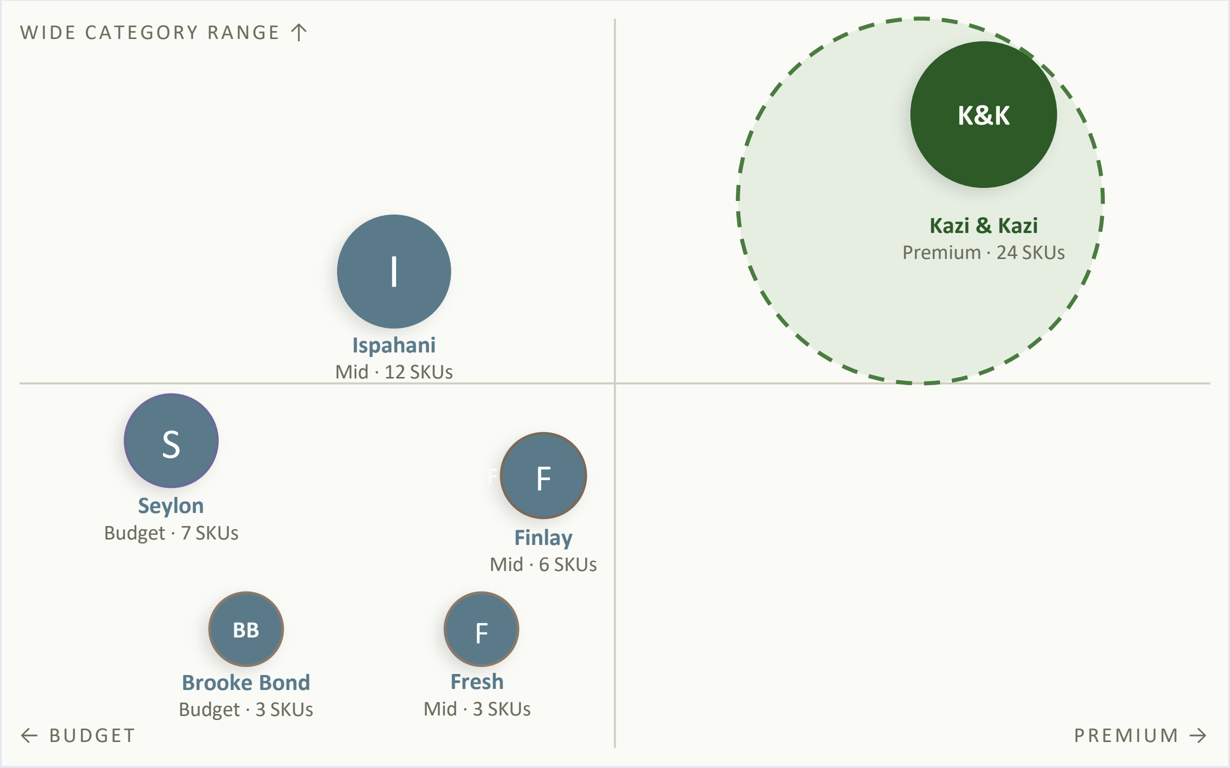
Bangladesh Tea Market

A Competitive Landscape Analysis

6 Brands Analyzed	**55** SKUs Mapped	**6** Competitive Dimensions

Pricing · Availability · Certification · Category Breadth · Social Reach · Export

The Premium + Certified Segment Remains Uncontested



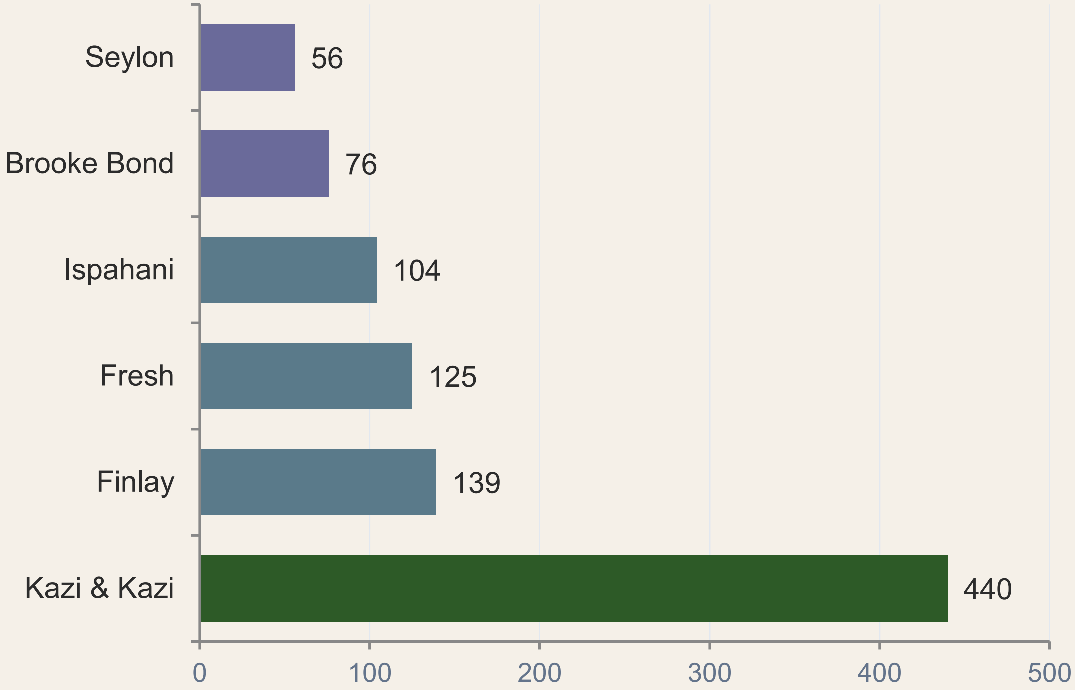
KEY INSIGHT

Uncontested Premium Zone

No competitor combines organic certification, Fairtrade status and premium pricing. The top-right quadrant position is structurally defensible.

- Organic + Fairtrade certified
- No certification

The Premium Segment Commands a 4× Price Over Mid-Tier Brands



TIER BREAKDOWN

Premium Kazi & Kazi only

Mid Ispahani · Fresh · Finlay

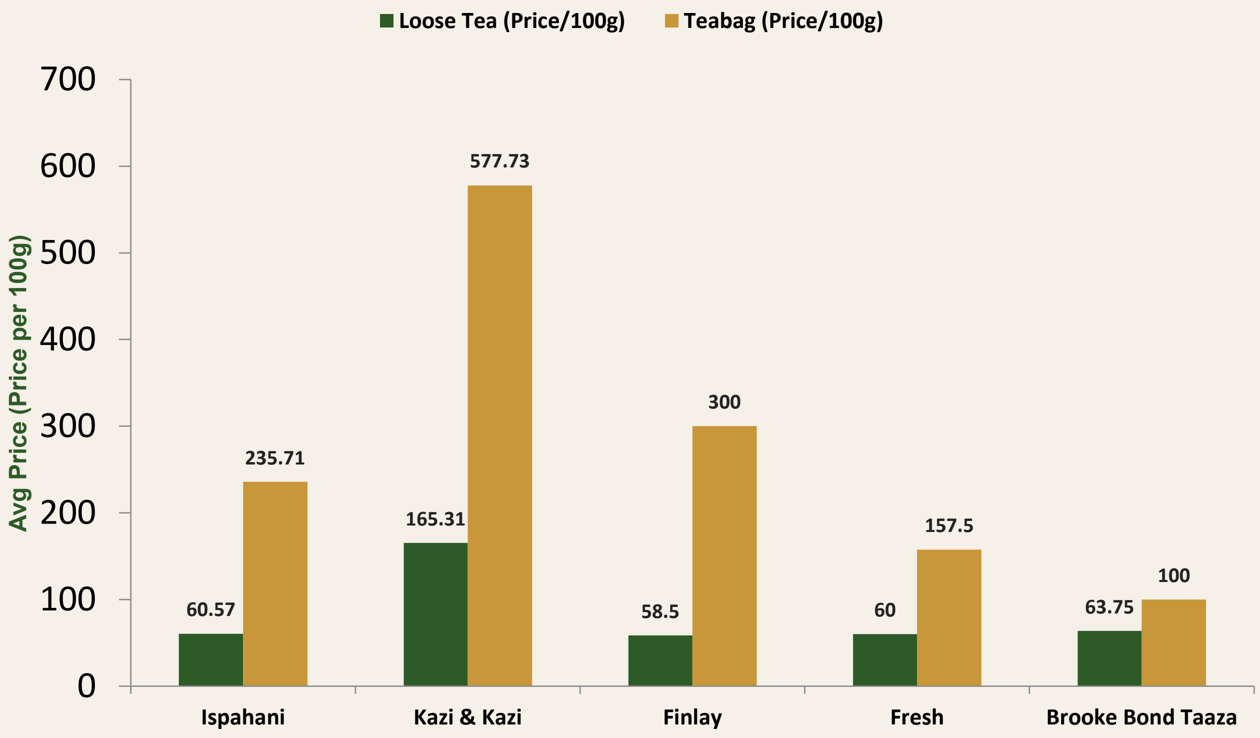
Budget Seylon · Brooke Bond

PREMIUM BRAND INTERNAL PRICE LADDER

Specialty / Herbal	**BDT 661 / 100g**
Green Tea	**BDT 435 / 100g**
Black Tea	**BDT 169 / 100g**

This data is not calculated keeping the tea format in mind.

Teabag VS Loose Format Price Comparison



KEY INSIGHT

Premium Format is The Real Price Driver

Teabag prices range ৳100–৳578/100g while loose tea clusters tightly at ৳58–৳165. The gap isn't about tea quality, it's about format and brand positioning.

- Kazi & Kazi charges 3.5x more for teabags than loose
- Brooke Bond Taaza has the smallest gap

Finlay & Fresh Show Shelf Presence Risk — Others Maintains Strong Availability

Seylon	Ispahani	Kazi & Kazi	Fresh	Finlay
86%	83%	79%	33%	33%
6 of 7 SKUs	10 of 12 SKUs	19 of 24 SKUs	1 of 3 SKUs	2 of 6 SKUs
			⚠ SUPPLY GAP	⚠ SUPPLY GAP

💡 Finlay's 67% out-of-stock rate signals supply instability. Their health-aware customers who are already paying BDT 75–150/100g are the most likely adjacent segment to convert to KK's certified organic black tea range.

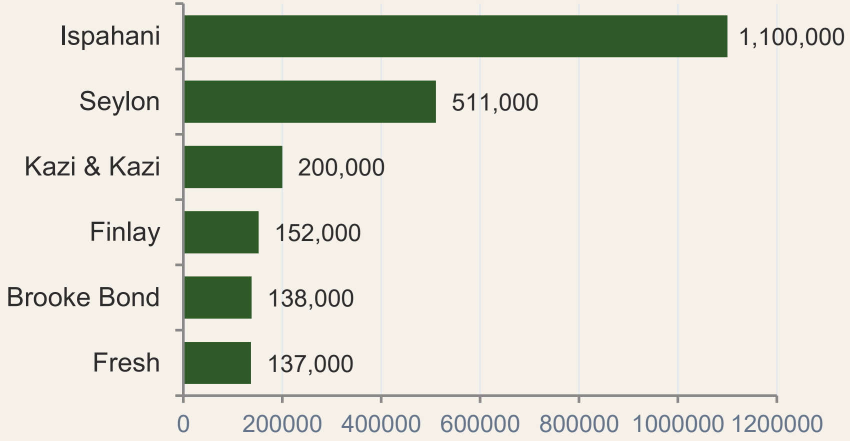
Certification Creates a Structural Moat But Digital Reach Remains an Untapped Opportunity

CERTIFICATION STATUS

Brand	Organic	Fairtrade	Export
Kazi & Kazi	✓ Yes	✓ Yes	✓ Yes
Ispahani	— No	— No	✓ Yes
Seylon	— No	— No	✓ Yes
Finlay	— No	— No	✓ Yes
Brooke Bond	— No	— No	— No
Fresh	— No	— No	✓ Yes

🔒 KK is the only brand in Bangladesh with both Organic and Fairtrade certification. That is a regulatory and reputational barrier no competitor can replicate quickly.

FACEBOOK FOLLOWING — DOMESTIC REACH



⚠ KK's 200K following is 5.5× smaller than Ispahani's 1.1M. This gap represents a significant opportunity to grow the premium consumer funnel domestically.

Three Strategic Priorities for the Market Leader

01 Capture Finlay's Disrupted Customer Base

OPPORTUNITY · SHORT-TERM

Finlay's 67% out-of-stock rate creates an acquisition window. Their health-aware customers — paying BDT 75–150/100g — are the most likely segment to trade up to KK's certified organic black tea (avg BDT 169/100g). A targeted online campaign could intercept them before they default to mid-tier alternatives.

02 Close the Domestic Digital Gap

DEFENSE · MEDIUM-TERM

KK's 200K Facebook following vs. Ispahani's 1.1M is a prioritization problem, not a brand problem. The organic certification, Fairtrade status, and international presence give KK stronger content material than any competitor. Closing half this gap through consistent social content would meaningfully grow the premium consumer funnel.

03 Deepen the Specialty / Herbal Moat

GROWTH · LONG-TERM

KK's specialty teas command BDT 525–1,307/100g which is the highest in this analysis with zero certified organic competition domestically. Increasing SKU depth and in-stock reliability in this category protects KK's highest-margin range. Competitors have no credible path to compete here on certification.
